DETAILED ACTION

1. In claims 19 and 37 it is suggested that the more conventional term "substantially one and the same" be used, instead of "substantially one in the same" as taught in the amendment, in order to clarify the claims.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 52-69 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The addition of the less than approximately 50, 25 or 20% to the claims was not taught or described in the application as originally filed. Applicant's specification teaches specific percentages, but does not provide support for the broad ranges claimed in the newly submitted claims 52-69. This addition constitutes new matter and should be removed.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11

Art Unit: 1712

F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-51 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6248263. Although the conflicting claims are not identical, they are not patentably distinct from each other because although the present claims differ in teaching a molecular weight, the use of polymers with at least as low a molecular weight as 1000-5000 daltons would be instantly envisaged by one of ordinary skill in the art, since such weights are so low.

6. Applicants amendment has overcome the rejections over EP '826, which fails to teach that the crosslinking and forming the polymer chain is not one and the same reaction, or that the polymer chains are formed prior to the crosslinking reaction. Applicant has filed a terminal disclaimer which removes the rejection over US 5,928,572, but did not file a disclaimer with respect to US 6,248,263. The rejection over the latter is thus maintained. A typographical error in the first office action indicated that claims 3-47 were rejected, when this clearly should have been 3-51. Applicants new claims 52-69 add new matter, and are rejected herein under 35 USC 112.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
